## Summary

Software developer experienced in TypeScript, React, Redux, HTML/CSS, JavaScript, and various development tooling such as git, TDD, Agile, CI/CD, etc, seeking an ambitious team to write maintainable, well-tested, and performant code that generates massive business values for its company and people.

## Projects

Movie Sync - [app.movie-sync.com](#)

- Generated over 28k new users on launch day.
- Collaborated with the designer to build front-end UIs that best reflect the design and ensure optimal UX utilizing **React**, **Redux**, **TypeScript**, and Styled-Component
- Ensured proper NoSql database design to maintain high query efficiency

Tried and True - [triedandtrue-8e7b9.web.app](#)

- Designed the relational database schema following best practices.
- Built with **C#**, **ASP.NET**, **GraphQL**, and **PostgreSQL**
- Embraced **unit** and **integration tests** for both front-end and back-end with **automated testing** via CI

## Work Experiences

*Cloud Sky Technologies |* **Front-end Developer** *| 2020 - 2021*

- build lightning-fast static web front-end and landing pages for companies that handle upwards of 10 million requests per month with **HTML**, **CSS**, and **JavaScript**.
- Doubled the conversion rate for one client by reducing page loading speed by 30%.

*O'Brian's Finance Group |* **Sales** *| 2019 - 2020*

- Lead the board on sales target consecutively for 3 months

*Greencity Building Solutions LTD |* **Web developer** *| 2016 - 2019*

- Built website and associated landing pages with **HTML, CSS**, and WordPress that accounted for 60% of total revenue.

## Education

*Computer Science | University of Saskatchewan | 2015 - 2019*
